

I am a nineteen-year-old individual who is concerned about the future. This issue involving Sinclair's anti-Kerry broadcast just days before a very important election makes me question the future of democracy. I have confidence that the FCC will take appropriate action towards this barefaced form of propaganda. The public will be victimized as they are bombarded with this one-sided attack on a candidate. This is an unfair advantage, and I am pleading for change. I am one voice that I believe is speaking for many, when I ask that we examine such behavior, in hope to save a democratic future.
